You've never seen a multifunction printer like this before. From its tablet-like user interface to its right-out-of-the-box mobile-friendly connectivity options, the Xerox® AltaLink B8000 Series is the multifunction device today's workers have been waiting for.

Optimized for business processes, and easy to manage as a standalone device or as part of an entire fleet, it's designed to enable multitasking and collaboration. Create personalized workflows, automate complex tasks, print and scan directly to and from the cloud with services such as Box®, Microsoft® OneDrive®, Google Drive™, Dropbox™, Microsoft Office 365™ and email. Connect any time, from anywhere on any device.

With the touch of a button, you can go to our Xerox App Gallery and download these simple, yet powerful, serverless apps to your AltaLink multifunction printer to increase user productivity and shorten everyday tasks.

Built-in mobile connectivity, including Near Field Communication (NFC) Tap-to-Pair, optional Wi-Fi Direct®, @PrintByXerox, Apple® AirPrint®, Google Cloud Print™, Xerox® Print Service Plug-in for Android™ and Mopria®, provides the time-saving convenience your workforce wants and needs.

POWERFUL AND SCALABLE

Your workgroups operate more efficiently and effectively with AltaLink. Manage, monitor and upgrade your entire fleet, or provide interactive training and support right from your desktop with our remote user interface.

Fewer maintenance hassles, less IT support, high-capacity paper trays and the ability to print on varying paper sizes add up to increased uptime and greater productivity. Scanning, printing and faxing can be done simultaneously, allowing for multitasking during peak periods—and your choice of finishing options means you can configure your AltaLink device for any work environment and any document type, including booklets, brochures and pamphlets.

BUILT-IN SECURITY

The AltaLink B8000 Series Multifunction Printer provides the maximum level of security through our partnership with McAfee, proactively addressing risks at the fleet and individual device level.

User credentials can be tailored, allowing IT departments or fleet managers complete control over which users have access to critical data and software. And with Secure Print, jobs can be issued a unique PIN to ensure confidential documents are held for release until they're ready to be retrieved at the machine.
